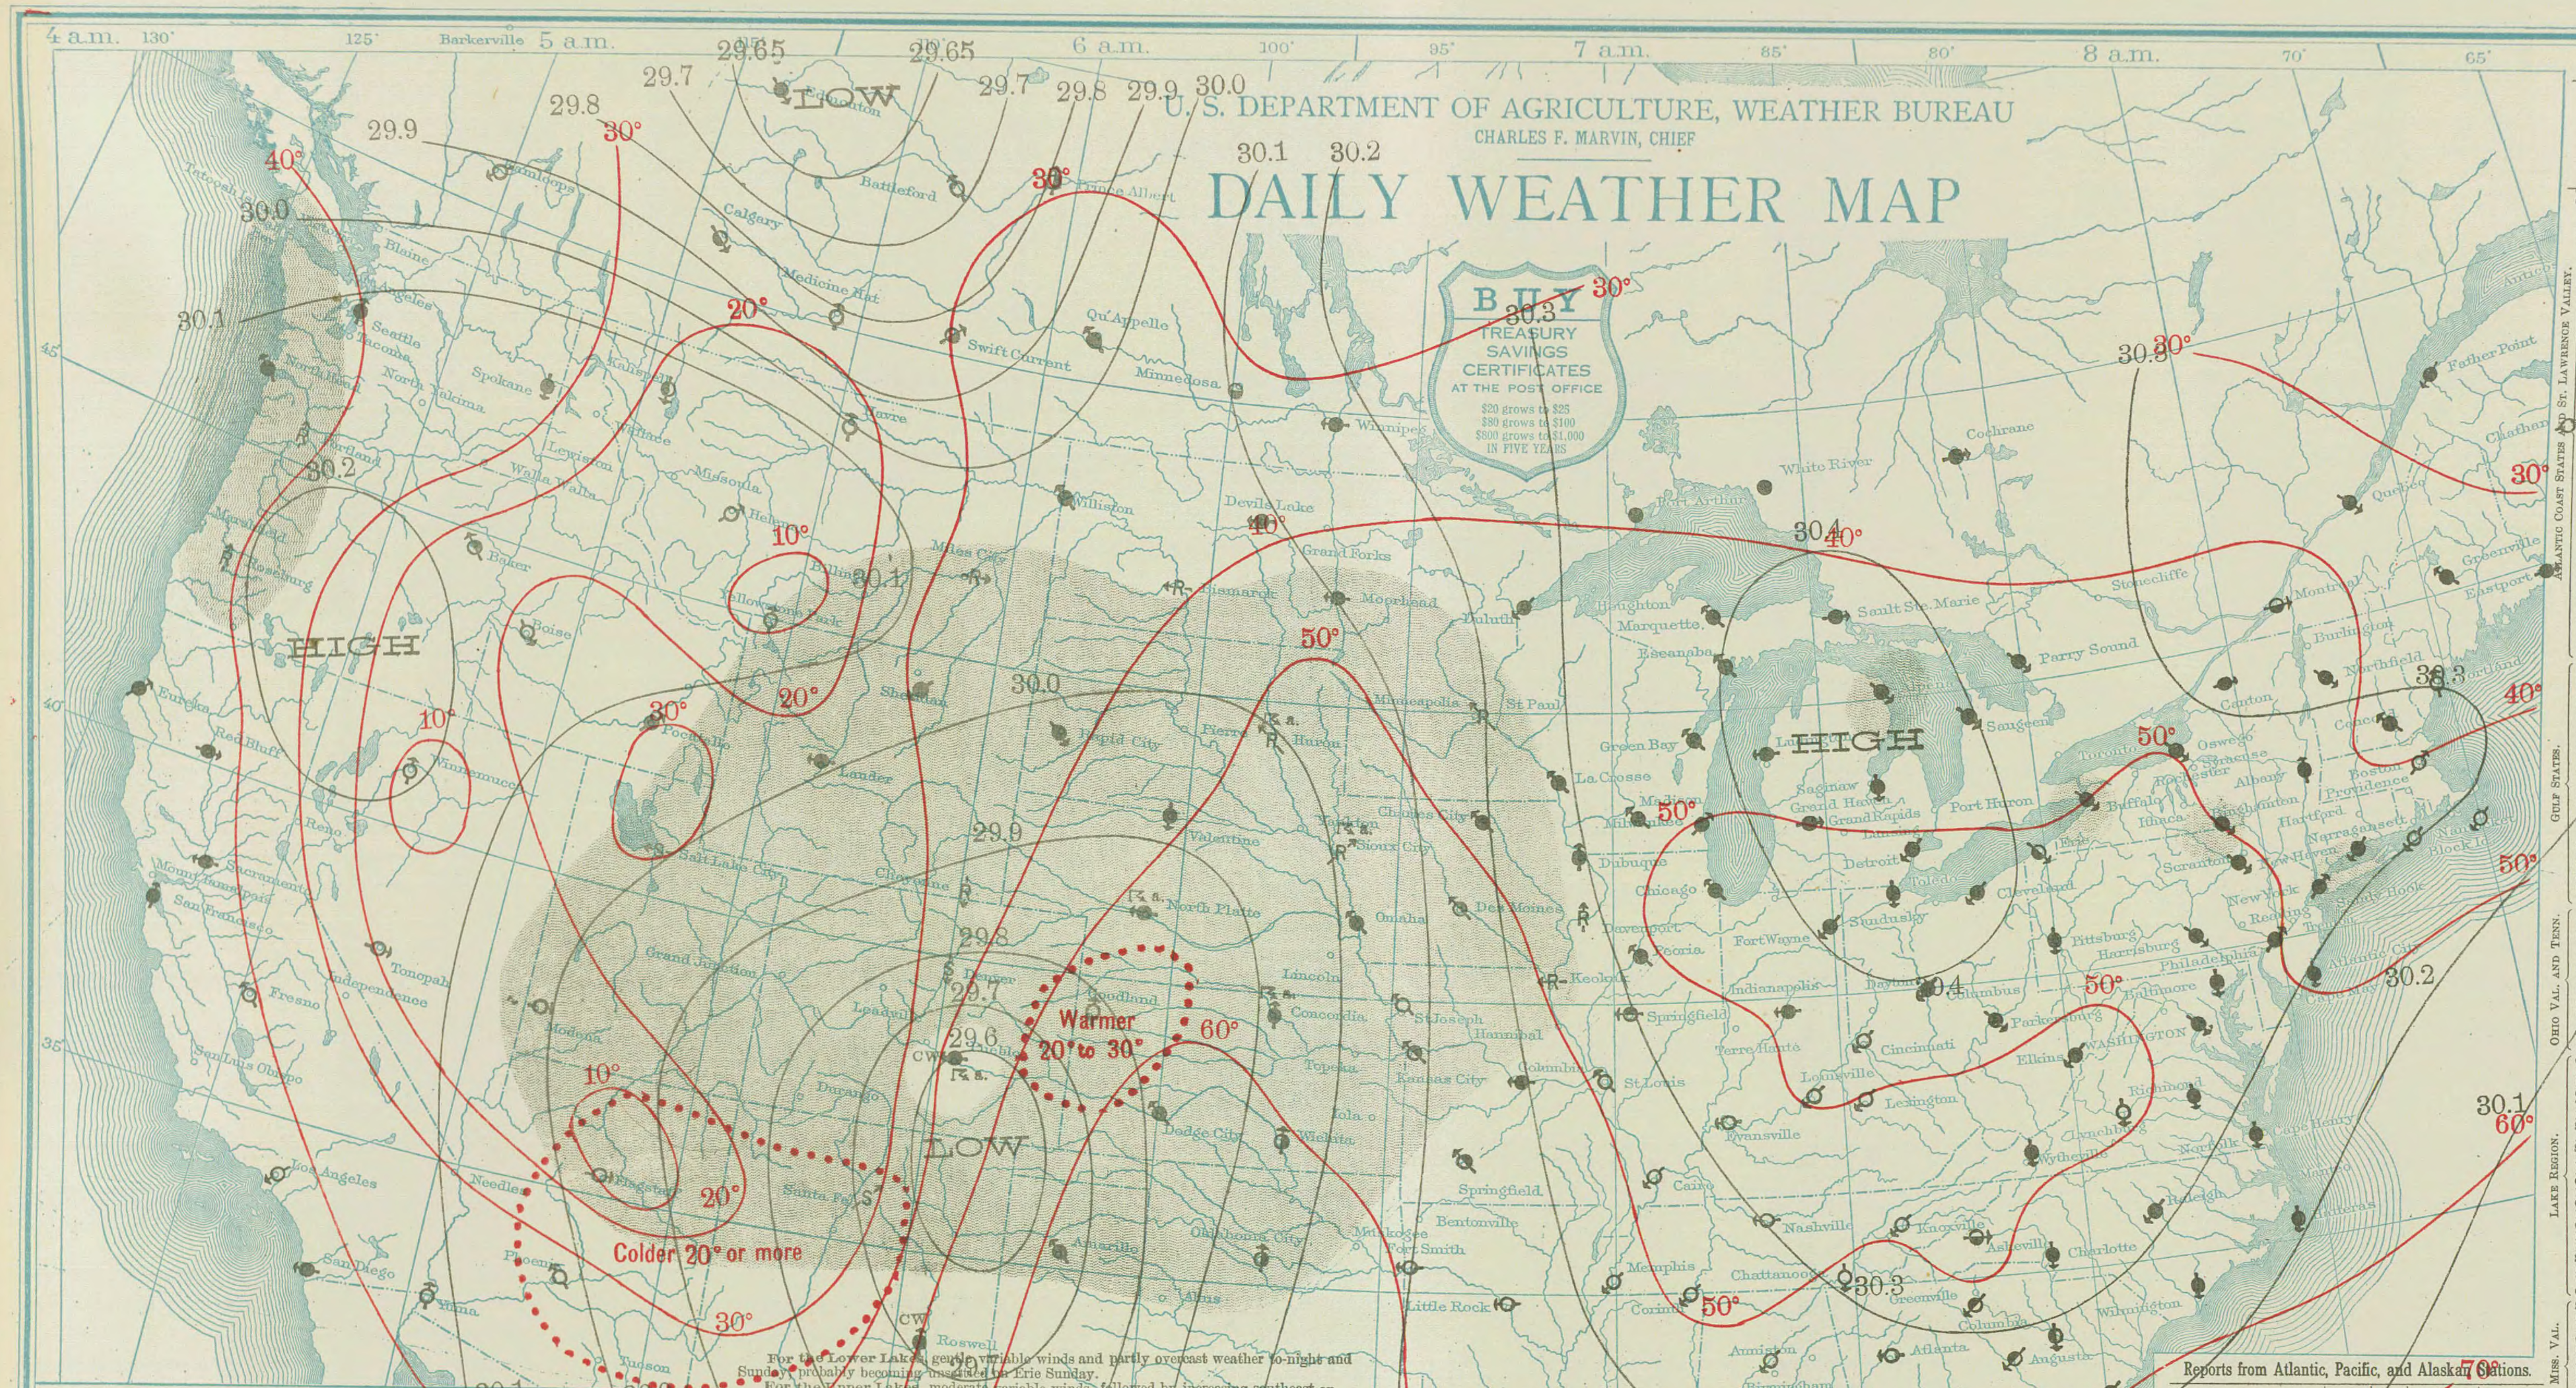
FORM MAP C

SECOND EDITION.

U. S. DEPARTMENT OF AGRICULTURE, WEATHER BUREAU

CHARLES F. MARVIN, CHIEF

DAILY WEATHER MAP



Washington, D. C., Saturday, November 4, 1922.---8 A. M.

WEATHER CONDITIONS AND GENERAL FORECAST.

A disturbance of marked intensity is central this morning over northeastern New Mexico whence it will move northeastward during the next 24 hours. This disturbance has been attended by snows and rains over the Rocky Mountain region and rains in the northern and middle Plains States. It has been preceded by a general rise in temperature over the Plains States and the west Gulf States, and it has been followed by much colder weather over the Rocky Mountain and Plateau regions and the interior of California. There was heavy frost this morning as far south as southern Arizona, and a temperature of 2° below zero at Flagstaff, Ariz. The pressure has risen throughout the Eastern States, and it is now high generally east of the Mississippi River, with the crest of the high over the region of the Great Lakes.

In the Middle Atlantic and New England States the weather will be partly cloudy to-night and cloudy and unsettled Sunday, with rain by Sunday night, with a continuation of moderate temperatures. In the South Atlantic States the weather will be fair to-night and Sunday, with mild temperature, while in the east Gulf States, Tennessee, the Ohio Valley and the lower Lake region the weather will be unsettled to-night and be followed by rains on Sunday, with mild temperature.

Along the north Atlantic coast the winds will be gentle, mostly northerly, and weather fair to-night and cloudy Sunday. Along the middle Atlantic coast the winds will be moderate northerly and weather partly cloudy to-night and unsettled Sunday. Along the south Atlantic coast the winds will be moderate north and northeast and weather fair to-night and Sunday. Over the east Gulf the winds will be moderate northeast and weather fair to-night and Sunday.

Steamers departing to-day for European ports will have moderate northerly winds and fair weather to the Grand Banks.

FORECAST TILL 8 P. M. SUNDAY.

For New England, partly cloudy to-night and Sunday; no change in temperature; moderate variable winds.

For Eastern New York, partly cloudy to-night; Sunday cloudy, rain in northwest portion; moderate temperature; moderate northwest winds.

For the District of Columbia, Eastern Pennsylvania, New Jersey, Delaware, Maryland, and Virginia, partly cloudy to-night; Sunday cloudy, rain by Sunday night; moderate temperature; gentle to moderate northerly winds, becoming variable.

For North Carolina, South Carolina, Georgia, and Florida, fair to-night and Sunday; moderate temperature; gentle to moderate north and northeast winds.

For Extreme Northwest Florida, and Alabama, fair to-night, warmer in the interior; Sunday cloudy, with showers; moderate east and southeast winds.

For Mississippi, cloudy to-night, warmer in north portion; Sunday showers; moderate east and southeast winds.

For Tennessee, and Kentucky, partly cloudy in east and showers and warmer in west portions to-night; Sunday showers.

For West Virginia, partly cloudy to-night; Sunday showers and warmer.

For Western New York, Western Pennsylvania, cloudy to-night; Sunday rain; moderate temperature.

For Ohio, increasing cloudiness, followed by rain Sunday and in extreme west portion to-night; warmer Sunday.

E. H. BOWIE.

For the Lower Lakes, gentle variable winds and partly overcast weather to-night and Sunday, probably becoming unsettled on Erie Sunday.

For the Upper Lakes, moderate variable winds, followed by increasing southeast on Michigan and easterly on Superior; overcast weather, rain on Michigan and Superior to-night and Sunday and on Huron by Sunday.

For Indiana, probably showers to-night and Sunday; warmer in south portion to-night.

For Lower Michigan, probably rain to-night and Sunday.

For Upper Michigan, rain to-night and Sunday; warmer in extreme northwest portion to-night.

For Illinois, showers to-night and Sunday; warmer in south and central portions to-night.

For Missouri, probably thundershowers to-night and Sunday; warmer in east portion to-night.

For Wisconsin, Minnesota, rain to-night and Sunday.

For Iowa, probably thundershowers to-night and Sunday; warmer in east portion to-night; cooler in extreme west portion Sunday.

For North Dakota, probably showers to-night and Sunday.

For South Dakota, probably rain to-night and Sunday; cooler in northeast portion to-night and in southeast portion Sunday.

For Nebraska, probably snow in extreme west, showers in central and thundershowers in east portion to-night and Sunday; colder in west portion to-night and in east portion Sunday.

For Kansas, thundershowers in north, fair in south portion to-night, colder in west portion; Sunday fair and colder.

For Montana, fair to-night and Sunday, except probably showers in extreme south-east portion.

For Wyoming, rain or snow in east, fair in west portion to-night; Sunday fair and warmer.

For Colorado, rain or snow and colder to-night; Sunday fair, colder in east portion; moderate cold wave in south-central and extreme east portions.

For New Mexico, fair in west and south, rain or snow in northeast portion to-night, colder; Sunday fair, colder in extreme east portion; moderate cold wave in south and extreme east portions.

For Arizona, fair to-night, freezing temperature in south-central and southeast portions, killing frost in extreme southwest portion; Sunday fair and warmer.

For Utah, fair to-night and Sunday; colder in southeast portion to-night; warmer in west portion Sunday.

For Northern California, showers to-night and Sunday; warmer to-night.

For Southern California, fair to-night and Sunday.

For Nevada, and Idaho, fair and warmer to-night; Sunday rain or snow.

For Washington, and Oregon, rain to-night and Sunday; warmer in east portions to-night.

For Louisiana, rain to-night or Sunday; light to fresh east to south winds on the coast.

For Arkansas, rain to-night and Sunday; warmer in east portion to-night; cooler in west portion Sunday.

For Oklahoma, rain in east and fair in west portion to-night, cooler, probably freezing temperature in extreme northwest portion; Sunday fair and cooler.

For Eastern Texas, rain to-night, cooler in west portion; Sunday fair and cooler; moderate to fresh south to west winds on the coast.

For Western Texas, fair to-night and Sunday; cooler to-night and in east portion Sunday; probably freezing temperature in extreme west portion and in the Panhandle to-night.

Observations are taken at 8 a. m. and 8 p. m., 75th meridian time. Barometer readings are reduced to sea level and standard gravity. When heavy dotted red lines appear they indicate regions of marked changes in temperature during the last 24 hours. Shaded areas show regions of precipitation of .01 inch or more during the last 24 hours. Arrows point in the direction the wind is blowing. Solid black lines are isobars and solid red lines isotherms.

Wind velocities of less than 10 miles an hour, and amounts of precipitation of less than .01 of an inch, are not published hereon.

Symbols indicate: ○ clear, ◑ partly cloudy, ● cloudy, R rain, S snow, ▲ hail, △ sleet, storm warnings, CW cold wave warnings, →⊕→ storm track and location of storm center, date above, time (a. m. or p. m.) below, a, p, thunder-storms at or near the station during 12 hours ending 8 a. m. or 8 p. m., respectively.

WIND-BAROMETER INDICATIONS.

When the wind sets in from points between south and southeast and the barometer falls steadily a storm is approaching from the west or northwest, and its center will pass near or north of the observer within 12 to 24 hours with wind shifting to northwest by way of southwest and west. When the wind sets in from points between east and northeast and the barometer falls steadily a storm is approaching from the south or southwest, and its center will pass near or to the south or east of the observer within 12 or 24 hours with wind shifting to northwest by way of north. The rapidity of the storm's approach and its intensity will be indicated by the rate and the amount of the fall in the barometer.

Statute Miles: 100 50 0 100 200 300 400

Kilometers: 100 50 0 100 200 300 400 500
