ПРИМЕДБЕ

Географске координате Метеоролошке опсерваторије су ове: $\varphi = 44^{\circ} 48'$ $\lambda = 20^{\circ} 28'$ источно од р., $H_b = 138,3$ м.

За осматрање служе Фортонов барометар, аудин № 113, термометри, ветроказ, кишомери, хигрометар конструкције Фус.

Барометарска осматрања сведена су на 0° . Корекција теже за средњи притисак ваздуха износи само $-0,034$ мм. и зато се може занемарити. Корекције код максималног и минималног термометра унесене су приликом сваког осматрања.

Термометри и хигрометри налазе се у заклону, над травним земљиштем на 2,0 м. изнад земљине површине, а на апсолутној висини од 131,8 м. Кишомери су на висини од 1,5 м. Барометар се налази на висини од 6,45 м. изнад бетонске плоче која постоји око зграде Опсерваторије. Ветроказ је постављен на крову Опсерваторије, на 17,0 м. изнад земљине површине, а на апсолутној висини од 146,8 метара.

OBSERVATIONS

Les coordonnées géographiques de l'Observatoire Météorologique sont les suivantes: $\varphi = 44^{\circ} 48'$, $\lambda = 20^{\circ} 28'$ E. Gr., $H_b = 138,3$. On s'est servi, pour les observations, du baromètre Fortin, de Baudien № 113, des thermomètres, de la girouette, des pluviomètres et du hygromètre Feuss. Les observations barométriques sont réduites à 0° . La correction de la pesanteur pour la pression moyenne ne dépasse pas $-0,034$ mm et c'est pourquoi on peut la négliger. Les corrections du thermomètre à maxima et du thermomètre à minima ont été faites lors de chaque observation.

Les thermomètres et le hygromètre sont placés sous l'abri au-dessus du sol herbeux, à 2,0 m au dessus du sol, et à 131,8 m de l'altitude absolue. Les pluviomètres sont à 1,5 m de hauteur, le baromètre à 6,45 m au dessus du pavé en ciment qui entoure le bâtiment de l'Observatoire, et la girouette est placée sur une plate-forme à 17,0 m au-dessus du sol, à l'altitude absolue de 146,8 mètres.
