On the 1st at 12.05 p.—The depression lying over N. China yesterday, has reached the neighbourhood of Wladivostok.

A second area of low pressure has formed off the E. coast of Formosa.

Pressure has given way over S. China, W. Japan and the Loochoos, which it is increasing over the NE coast of China.

Probably a high pressure area will spread over China from the NW, and the wind is expected to freshen considerably from the Northward along the coast.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0.00 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON TO-MORROW.

FORECAST DISTRICT.	
Hongkong and Neighbourhood,	N. winds, freshening considerably; fine, squally.
Formosa Channel,	Same as No. 1.
South coast of China between Hongkong and Lamoochs, ..	Same as No. 1.
South coast of China between Hongkong and Hainan, ...	Same as No. 1.

F. G. FIGG,
Director.

On the 2nd at 11.55 a.—Pressure has increased considerably over China, and given way quickly in Japan. The depression which was crossing the Sea of Japan yesterday, lies now off the E. coast of Hokkaido. An anticyclonic area, central over the continent to the North of the Yangtze valley, now covers China. Very strong monsoon may be expected along the coast and over the China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0.00 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON TO-MORROW.

On the 8th at 11.55 a.—The barometer has fallen rapidly at Nemuro the depression lying to the S.E. of do yesterday, having moved Northwards and approached the neighbourhood of that station. The barometer has fallen moderately over China, and risen slightly over S.W. Japan and the Bonins. Probably a depression is approaching N. China from the Westward. The highest pressure is now shown over the Lower Yangtze valley. Fresh to moderate monsoon is indicated over the China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 9.01 inches.

On the 12th at 11.55 a.—The barometer has fallen in E. Japan, a depression having appeared to the N. of Hokkaido.
 Pressure has increased moderately over N. China and W. Japan, while it is inclined to give way over Taiwan and the S. coast of China.
 The anticyclonic area is still central over the continent to the North of the Yangtze valley.
 Fresh to strong monsoon will continue to prevail over the China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 5.00 inches.

On the 20th at 12.25 p.—The barometer has risen considerably over Japan, and fallen moderately over and Tongking.

The high pressure area has shifted Eastwards, and is now central over the Yangtze valley, and probably pressure is forming over Western China.

The depression lying over N.E. Japan yesterday, has moved away over the Pacific.

Fresh to moderate monsoon may be expected over the China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a. m. to-day 0.90 inches.

On the 24th at 12.05 p.—The depression lying off the E. coast of Hokkaido yesterday, has moved away off Pacific.

The anticyclonic area is still central over Manchuria, and pressure has increased moderately over N. China to a slight extent over S. China.

The depression is still shown over Tongking, and a "low" area lies also in the neighbourhood of the S. Loochoos.

Very strong monsoon is indicated in the North, and strong E. winds over the northern shores of the China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0.01 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON TO-MORROW. FORECAST DISTRICT.

On the 26th at 12.15 p.—A further slight increase of pressure has taken place over China, while a new one has occurred in Wladivostok.

The Japanese returns are lacking, but probably the shallow depression lying in the neighbourhood of Choos yesterday, has moved Eastwards.

The anticyclonic area is central over the continent to the North of the Yangtze valley. Fresh to strong monsoon may be expected over the China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 6.06 inches.

On the 1st at 12.20 p.—Pressure has given way moderately over the E. and N.E. coasts of China, and W. Japan and the Loochoos.

A depression appears to be developing over the Pacific to the Southward of the latter area.

The anticyclonic area is now central over the Sea of Japan.

The monsoon will probably moderate somewhat over the China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0.01 inches.

On the 7th at 12.05 p.—The depression lying over the N. part of the Sea of Japan yesterday, has deepened considerably during its progress Eastwards. It is now situated over Hokkaido. Pressure has increased moderately over W. Japan and the Loochoos, and fallen again over N. China. As depression appears to be approaching the latter area from the Westward. The high pressure area remains over S. China. The monsoon will moderate along the coast, but continue to blow strongly over the China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0.03 inches.

8th at 11.55 a.—Pressure has increased moderately over Eastern Japan, the depression which was central to-day yesterday, having passed into the Pacific. A second depression is approaching the Sea of Japan from the north. High pressure has decreased moderately along the China coast and over the Loochoos. High pressure area remains over S. China, but has weakened. Late monsoon may be expected along the coast, and fresh to strong in the China Sea.

Long Rainfall for the 24 hours ending at 10 a.m. to-day, 0.00 inches.

The 10th at 11.55 a.—Pressure has decreased considerably over Eastern Japan and moderately over S.W. It has risen along the N.E. coast. A depression which was yesterday over Manchuria has deepened during its passage Eastward, and now lies off Kaido. The area of highest pressure lies over the Yangtze valley. The monsoon will be fresh along the coast and moderate over the China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0.00 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON TO-MORROW.

FORECAST DISTRICT.	
Hongkong and Neighbourhood,	N.E. winds, moderate to fresh; fine.
Channel,	Same as No. 1.
East of China between Hongkong and Lamoocks, ..	Same as No. 1.
East of China between Hongkong and Hainan, ...	Same as No. 1.

On the 5th at 12.15 p.—The Northern anticyclone, and the depression which was yesterday over Japan have passed into the Pacific, leaving very shallow gradients, except over S. China and the Formosa channel. Pressure has decreased slightly along the coast of China, and moderately over Indo China, where a fairly well marked depression now lies. Moderate E. winds may be expected along the S.E. coast and light to moderate over the N. China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0.00 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON TO-MORROW. FORECAST DISTRICT.

—Hongkong and Neighbourhood,	Light to moderate E. winds, cloudy, foggy and rainy
—Formosa Channel,	N.E. winds, fresh. [later.
—South coast of China between Hongkong and Lamocks, ..	Same as No. 1.
—South coast of China between Hongkong and Hainan, ...	Same as No. 1.

On the 10th at 12.30 p.—The depression which formed yesterday to the SW of Manchuria now lies to the SW of Korea. Pressure has decreased moderately along the China coast to Haiphong.

Pressure is highest over SE Japan. Depressions are forming apparently over China and Indo-China.

Light variable winds may be expected along the SE coast, and moderate but decreasing E. winds over the China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0.00 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON TO-MORROW.

On the 21st at 12.20 p.—The northern depression is now situated in the neighbourhood of Wladivostock. The high which was yesterday to E.N.E. of the Bonins has passed into the Pacific. Pressure has risen considerably over N. China, but given way along the S.E. coast. No returns from Indo-China. Light or variable winds may be expected along the coast, and over the China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0.00 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON TO-MORROW.

FORECAST DISTRICT.

- Hongkong and Neighbourhood,
- Formosa Channel,
- South coast of China between Hongkong and Lamocks, ..
- South coast of China between Hongkong and Hainan, ...

Moderate to light E. winds, fine at first, cloudy later.
N.E. winds, moderate.

On the 28th at 11.55 a.—The northern depressions now appear as a single depression to the East of Japan. Pressure has increased moderately along the East coast of China, but decreased slightly along the S.E. and S. coasts. No returns from Indo-China. Freshening E. winds may be expected along the East coast, and moderate S.E. winds backing to East, over the N. China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0.00 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON TO-MORROW.

On the 5th at noon.—The northern depression developed into a severe typhoon yesterday. It has now passed into the Pacific.

Pressure remains high over N. China, but will probably give way to-day.

A depression appears to be forming to the East of Formosa.

Fresh N. winds may be expected along the coast, and moderate N.E. winds over the N. China Sea:

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0.83 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON TO-MORROW. FORECAST DISTRICT.

On the 6th at 11.50.—Pressure has given way over N. China. A depression appears to be forming over S. Man-
 uria.
 The depression which formed yesterday to the E. of Formosa is moving in a N.E. direction. It is still shallow.
 Pressure is highest over the lower Yangtze valley and Central Japan.
 Fresh N. winds are indicated along the coast, moderating later; and moderate N.E. winds over the China Sea.
 Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0.00 inches.

On the 10th at 11.35.—The depression which formed over Manchuria yesterday has deepened considerably in its passage Eastward; it now lies over Hokkaido.

Pressure has risen rapidly over the lower Yangtze valley, which is now covered by an anticyclone. This has temporarily re-established a fresh monsoon along the coast.

Fresh to moderate N.E. winds may be expected over the N. China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0.00 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON TO-MORROW.

FORECAST DISTRICT.

On the 12th at 11.30.—Pressure over Japan is recovering very slowly. It has increased again on the E. coast of China, after a slight decrease, and has continued to increase on the S. coast.

A well developed anticyclone now lies to the S. of the Yangtze valley, and extends into the Eastern Sea.

Fresh N. and N.E. winds are indicated along the S.E. coast, and over the N. China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day. 0.39 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON TO-MORROW.

FORECAST DISTRICT.

- Hongkong and Neighbourhood,
- Formosa Channel,
- South coast of China between Hongkong and Lamooks, ..
- South coast of China between Hongkong and Hainan, ..

N.E. winds, fresh, fair.
 N.E. gale.
 Same as No. 1.
 E. winds, moderate.

On the 13th at 12.30.—Depressions lie to the N.E. of Hokkaido and over Manchuria. The anticyclone has advanced to the S. of Japan, leaving a tongue of relatively high pressure over S. China. Pressure is, however, giving way over the latter area. Variable winds may be expected along the coast, and moderate E. winds over the N. China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0.00 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON TO-MORROW.

FORECAST DISTRICT.

On the 6th at noon.—The northern depression has travelled to the N. of Hokkaido. The depression which formed over the Gulf of Petchili yesterday now lies to the N.W. of Korea.
 Pressure has further decreased, slightly to moderately, along the China coast and over the Loochoos and Luzon.
 A tongue of relatively high pressure stretches from Amoy to the Bonins.
 Light or variable winds may be expected along the S.E. coast and moderate S.W. winds over the N. China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0.36 inches.

On the 10th at noon — The northern high has intensified and is now central over Japan. Conditions over the S.E. coast of China and Formosa are abnormal. An area of high pressure over the former district is producing a steep gradient over the Formosa Channel. Pressure is everywhere in excess of the normal except at Honins where it is normal. Moderate N.E. winds may be expected along the S.E. coast, and fresh but moderating E. winds over the N. China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day 0.00 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON TO-MORROW.

FORECAST DISTRICT.

- Hongkong and Neighbourhood,

On the 11th at 11.40 — The area of high pressure is now central over Tokio. Pressure has decreased considerably along the N.E. coast of China, and moderately over the Loochoos and Western Japan, under the influence a depression which has apparently formed over N. China.

Pressure has increased slightly over Indo-China and the Philippines.

Moderate S. to S.W. winds may be expected along the E. coast, and light S.E. or variable winds over the China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day. 0.00 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON TO-MORROW.

On the 15th at 11.40.—The depression which formed over N. China yesterday, has moved Eastward. It extends over a large irregular area.

Pressure is lowest at Wladivostok, Weihaiwei, and Kagoshima, and highest over the Bonins, and the Yangtze valley.

The high is passing into the Pacific, and a second is appearing over the Yangtze valley.

Moderate NE winds may be expected along the E. coast, and light airs, freshening slightly from NE, over the China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0.03 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON TO-MORROW.

FORECAST DISTRICT.

Hongkong and Neighbourhood,	Light airs freshening slightly from E. or NE; fair, NE winds, moderate. [becoming cooler.]
Formosa Channel,	Same as No. 1.
South coast of China between Hongkong and Lamooks, ..	Same as No. 1.
South coast of China between Hongkong and Hainan, ...	Same as No. 1.

On the 15th at 8.30.—Black Ball hoisted.
 At 11.55.—Pressure has increased considerably over Japan and E. Manchuria, the northern depression having passed into the Pacific, and the relatively high pressure having moved north-east-ward to S. Japan.
 Pressure has decreased moderately along the coast. The depression which formed over Tonking yesterday, has deepened. It is apparently travelling E.N.E to the N. of Pakhoi. Pressure is now steady at Hongkong.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day 0.04 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON TO-MORROW.

On the 15th at 5.15—Signals lowered.

At 11.35.—Pressure has increased considerably over central and North Japan, the high having further advanced north-east-ward.

The Southern depression which appeared yesterday as a shallow typhoon, has spread Eastward, and now extends from Tongking to the S. Loochoos.

Pressure has again given way over Tongking.

Fresh S.W. winds and squally weather may be expected over the N. China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0.95 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON TO-MORROW.

FORECAST DISTRICT.

On the 18th at 11.55.—Pressure remains high over Japan and the Ponins.
 The Southern depression has broken up, but pressure is still below normal over Tongking.
 A deep depression has formed rapidly to the N.E. of Wei-Hai-Wei.
 Moderate S. winds may be expected over the Western portion of the China Sea, and light or variable winds over the Eastern portion.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0.09 inches.

On the 22nd at 11.40.—The Northern depression has passed into the Pacific. Pressure has increased considerably over Japan in consequence. It has also increased slightly along the China coast and over Formosa. There appears to be a depression to the S. of the Loochoos. Moderate N.E. winds may be expected along the S.E. coast of China, and light or variable winds over the China sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0.92 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON TO-MORROW.

FORECAST DISTRICTS.

Hongkong and Neighbourhood,	N.E. or variable winds, light; cloudy, some rain.
Japan Sea Channel,	N.E. winds, fresh.
South coast of China between Hongkong and Lamooks,	N.E. winds, moderate.
South coast of China between Hongkong and Hainan, ...	Same as No. 1.

T. F. CLANTON,
Director

On the 31st at 11.40.—Both depressions have moved Eastward, the first to the N.E. of Hokkaido, the second to the Loochoos.

Pressure has, in consequence, decreased moderately over these districts and increased over Manchuria and along the E. coast of China. Pressure has also decreased slightly over Indo-China and the Philippines.

Light or variable winds may be expected along the East coast of China and the Eastern portion of the China Sea. Moderate S. winds over the Western portion.

Hongkong Rainfall for the 24 hours ending at 10 a m. to-day, 0.12 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON TO-MORROW.

On the 2nd at 12 25.—The depression which was to the E. of Tokio yesterday now lies to the E. of Hokkaido. Pressure has decreased slightly at Nemuro in consequence. It has increased at all other stations; considerably over Central Japan, and moderately over S. Japan, the Loochoos and the Formos, and slightly elsewhere. Moderate S. winds may be expected along the China coast and over the Western portion of the China Sea. Light airs over the Eastern portion.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 1.42 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON TO-MORROW.

FORECAST DISTRICT.

- 1.—Hongkong and Neighbourhood,
- 2.—Formosa Channel,
- 3.—South coast of China between Hongkong and Lamocks, ..
- 4.—South coast of China between Hongkong and Hainan,...

On the 6th at 12.10.—The two northern depressions now appear as a shallow depression over central and N. Japan. A shallow depression still lies over Tongking. Pressure has increased moderately along the E. coast of China, and slightly along the S. coast and over the Philippines. It is highest over the Yangtze Valley. Moderate N.E. winds may be expected along the E. coast of China, and moderate S. winds over the China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a. m. to-day, 2.11 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON TO-MORROW.

FORECAST DISTRICT.

- 1.—Hongkong and Neighbourhood,
- 2.—Formosa Channel,
- 3.—South coast of China between Hongkong and Lamooks, ..
- 4.—South coast of China between Hongkong and Hainan, ...

S. winds, moderate; overcast, some rain.
 Fresh S.E. winds, backing to N.E.
 E. to S.E. winds, moderate.
 Same as No. 1.

On the 9th at 12.25.—The depression which covered the Yellow Sea yesterday, now lies over S. Japan. Pressure is increasing rapidly along the E. coast of China. It has increased slightly along the S. coast, and over N. Luzon, but has decreased over the S. Philippines. Moderate NE winds may be expected along the E. coast of China, and light or variable winds over the China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0.02 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON TO-MORROW.

FORECAST DISTRICT.

—Hongkong and Neighbourhood,	SE winds, light to moderate; cloudy, showery.
—Formosa Channel,	SE winds, freshening.
—South coast of China between Hongkong and Lamooks, ..	Same as No. 1.
—South coast of China between Hongkong and Hainan, ...	Same as No. 1.

On the 2nd at 12.10.—A somewhat deep depression has formed rapidly in the Strait of Korea. It will probably move eastward or northeastward.

Pressure remains low over the S.W. China. It has risen moderately over the Bonins and remains stationary over the Philippines.

Fresh S.W. to W. winds may be expected along the S.E. coast of China, and fresh to moderate S. winds over the N. China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0.12 inch.

FORECAST FOR THE 24 HOURS ENDING AT NOON TO-MORROW.

On the 3rd at 11.35.—The northern depression has travelled Eastward and now lies over central Japan. A shallow depression lies over China, apparently. Pressure has increased moderately along the East coast of China and over the Loochoos, and slightly along the coast of China. It remains stationary over the Philippines. Moderate S. winds are indicated along the coast and over the N. China Sea.

Hongkong Rainfall for the 24 hours ending at 10 p.m. to-day, 0.05 inch.

On the 19th at 12.15.—Shallow depressions lie over NE China and N. Siam. A depression has formed over the sea of Japan.

The depression over the Philippines is apparently developing into a typhoon, moving NW.

It is now central on the West coast of Luzon and still shallow.

Pressure remains high from the Bonins to S. Japan. It has given way moderately over Luzon, and slightly over the S. Philippines, Annam, Formosa, and the S. coast of China.

Freshening E. winds may be expected over the N. China Sea, and light or variable winds over the western portion.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0.00 in.

FORECAST FOR THE 24 HOURS ENDING AT NOON TO-MORROW.

FORECAST DISTRICT.

Hongkong and Neighbourhood,
 Formosa Channel,
 South coast of China between Hongkong and Lamooks, ..
 South coast of China between Hongkong and Hainan,

E. winds, freshening; fair at first, afterwards rainy.
 NE winds, fresh.
 Same as No. 1.
 Moderate SE winds, backing to East.

On the 19th at 17.0—Red South Cone with Red Drum below hoisted.

On the 20th at 11.30.—The depression over NE China has moved northeastward and now covers Manchuria. The depression which formed yesterday over the Sea of Japan has moved northeastward and now lies to the NE of Hokkaido.

The depression over N. Siam is not so well marked this morning.

The typhoon is now situated about 100 miles West of N. Luzon and appears to be travelling WNW slowly.

Freshening NE winds are indicated over the Northern portion of the China Sea and light or variable winds over the Western portion.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0.00 inch.

On the 24th at 6.30.—Black Ball hoisted.

At noon.—Signals lowered.

At 12.15.—A shallow depression has formed over the Eastern Sea.

The typhoon has entered the coast about 100 miles to the West of Macao. It is apparently moving northward slowly.

No returns from Japan.

Fresh to moderate SW winds are indicated over the Western position of the China Sea, and moderate S. winds over the Eastern portion.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 1.94 inch.

FORECAST FOR THE 24 HOURS ENDING AT NOON TO-MORROW.

FORECAST DISTRICT.

1.—Hongkong and Neighbourhood,	SE winds, fresh, squally, rainy.
2.—Formosa Channel,	Same as No. 1.
3.—South coast of China between Hongkong and Lamooks, ..	Same as No. 1.
4.—South coast of China between Hongkong and Hainan,...	S. to SW winds, strong.

On the 26th at 11.45.—Pressure has given way considerably to moderately over N. Japan, and slightly over N. China. It has increased slightly elsewhere.

The depression in the Eastern Sea has filled up. No returns from Indo-China this morning. Yesterday afternoon's observations show, however, that the typhoon passed near Haiphong on a westerly track.

Light to moderate S. winds are indicated along the E. coast of China.

Hongkong Rainfall for the 24 hours ending at 10 a. m. to-day, 0.00 inches.

On the 27th at 11.30.—A depression which formed yesterday over S. Manchuria has deepened slightly in its passage eastward. It is now central over the Sea of Japan.

Pressure is still highest in the Pacific between the Bonins and the Loochoos, but is giving way. It is also giving way over the central Philippines.

It has increased slightly over Formosa and S. E. China.

Light to moderate S. winds are indicated along the E. coast of China and moderate S.E. winds over the N. China

Hongkong Rainfall for the 24 hours ending at 10 a. m. to-day, 0.73 inches.

On the 25th at 11.55.—The northern depression has deepened considerably. It now lies to the N.E. of Hokkaido. Pressure has increased moderately over Manchuria, and slightly over Formosa and the S. coast of China. It has decreased slightly elsewhere.

Shallow depressions lie over central Annam, N.E. China, and the central Philippines.

Moderate S. winds are indicated along the East coast of China, and moderate E winds over the N. China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0.05 inches.

On the 29th at 11.50.—The depression over N.E. China has deepened slightly. Pressure has increased moderately over Tongking, N. Annam, and the S. Philippines, but has decreased slightly over Formosa.

No returns from Japan.

An area of low pressure lies to the West of N. Luzon. Should it develop into a typhoon, present conditions indicate that it will travel north or north-westward.

Light or moderate S. winds are indicated along the E. coast of China, and moderate E winds over the N. China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0.00 inches.

On the 5th at 11.24.—Pressure has increased moderately over the S. coast of China to Formosa. It has given way slightly over the Lower Yangtze Valley, the Central Philippines, and Cochin China.

The typhoon still appears as a shallow depression over N. Annam and Tongking.

An area of high pressure lies to the N.E. of Hokkaido, and an area of low pressure, probably a typhoon, to the South of the Bonins.

Moderate S.E. winds are indicated over the N. China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0.44 inches.

On the 12th at 12.15.—The anticyclone has further weakened and passed into the Pacific.
 The depression over China is now central to the north of the Yangtze Valley.
 Pressure has decreased slightly over the whole area, except Indo-China where it has increased slightly.
 Moderate S. winds are indicated along the East coast of China, and light or variable winds over the China Sea.
 Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0.05 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON TO-MORROW.

FORECAST DISTRICT.

Hongkong and Neighbourhood,	Light or variable winds; fair, some thunder showers.
Formosa Channel,	Same as No. 1.
South coast of China between Hongkong and Lamcocks, ..	Same as No. 1.
South coast of China between Hongkong and Hainan,	Same as No. 1.

On the 17th at 11.07.—Pressure has increased slightly over N. Japan and N. Annam, but is inclined to give way over the Philippines and Formosa. It is lowest over Tongking and highest between the Bonins and Japan. Gradients are shallow over the whole area. Light or variable winds are indicated along the East coast of China, and the Eastern portion of the China Sea. Moderate S. winds over the western portion.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0.00 inches.

On the 19th at 12.10.—Pressure has increased considerably over N. Japan, but has decreased moderately over Japan, the Loochoos, N. Formosa and along the coast near Foochow. It is stationary elsewhere.
 A depression, possibly a typhoon, lies over the S. Loochoos. It appears to be moving northward.
 Moderate N. winds, freshening and backing to N.W., may be expected along the East coast of China, and light or variable winds over the N. China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0.00 inches.

On the 26th at 12.00.—Pressure has increased moderately over central and North Japan. An anticyclone is central to the North of Hokkaido.

Pressure has decreased considerably over the Loochoos and moderately over N. Luzon, Formosa, and the S.E. coast of China, owing to a typhoon which formed yesterday to the East of N. Luzon, and is apparently travelling northward. Its approximate position at 6 a.m. this morning was latitude 26° N. and longitude 125° E.

Freshening N. winds are indicated along the E. coast of China, and light or variable winds over the N. China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0.49 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON TO-MORROW.

FORECAST DISTRICT.	
Hongkong and Neighbourhood,	Light or variable winds; fair, some thunder showers.
Formosa Channel,	N. to N.W. winds, freshening.
South coast of China between Hongkong and Lamocks, ..	Same as No. 2.
South coast of China between Hongkong and Hainan,	Same as No. 1.

On the 27th at 12.29.—No returns from Japan.
 Pressure has decreased elsewhere, considerably over Formosa, moderately over the Philippines, S. China, and Annam, and slightly over N.E. China.
 Observations to hand indicate that the typhoon has curved to westward and at 6 a.m., was in about latitude 25° N. and longitude 122° E.
 Observation from the Loochoos are necessary, however, to confirm this.
 Moderate to fresh N. winds may be expected along the E. coast of China.
 Hongkong Rainfall for the 24 hours ending at 10 p.m. to-day, 0.09 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON TO-MORROW.

FORECAST DISTRICT.	
1.—Hongkong and Neighbourhood,	N. winds, moderate; fine.
2.—Formosa Channel,	N. winds, fresh to strong.
3.—South coast of China between Hongkong and Lamooks,...	Same as No. 1.
4.—South coast of China between Hongkong and Hainan,...	Same as No. 1.

On the 28th at 12.00.—Pressure has increased slightly over N. Japan, and decreased considerably over the S. sechoos and Formosa, and slightly along the S. coast of China to Tourane.

Observations from the Loochoos received at 2.50 p.m. yesterday indicated that the typhoon was still travelling or N.N.E.

At 5 a.m. this morning it was within 50 miles to the S.E. of Ishigaki, travelling apparently N.W.

Fresh N. winds may be expected along the E. coast of China and moderate N.W. and W. winds over the N. China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0.00 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON TO-MORROW.

FORECAST DISTRICT.

Hongkong and Neighbourhood,	N.W. winds, moderate; fine.
Formosa Channel,	N.W. gale.
South coast of China between Hongkong and Lamoocks,.	N.W. winds, fresh.
South coast of China between Hongkong and Hainan,...	Same as No. 1.

On the 23th at 11.00.—Pressure has increased slightly over N.E. China, Annam and the Central Philippines. It has fallen considerably in the neighbourhood of Sharp Peak.

Communication between Formosa and the main land is interrupted. No returns from Japan.

At 6 a.m. this morning the typhoon, which is a very severe one, was probably about 60 miles to the N.E. of Taihoku, travelling N.W.

Westerly gales increasing in force and veering to N. and N.E. with increasing latitude, may be expected between Swatow and Ningpo.

Moderate W. winds over the N. China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0.00 inches.

On the 4th at 11.55.—Pressure has increased slightly in the neighbourhood of Wei Hai Wei, over S Luzon, and along the S. coast of China. It is highest in the neighbourhood of the Bonins.
 A shallow depression still covers the N. China Sea. Its centre lies between Hongkong and Luzon.
 Light or variable winds may be expected along the East coast of China, and moderate E. winds over the northern shores of the China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0.00 inches

FORECAST FOR THE 24 HOURS ENDING AT NOON TO-MORROW.

FORECAST DISTRICT.

- 1.—Hongkong and Neighbourhood,
- 2.—Formosa Channel,
- 3.—South coast of China between Hongkong and Lamooka,
- 4.—South coast of China between Hongkong and Hainan,

E. to N.E. winds, moderate; fair, some rain later.
 N.E. winds, fresh.
 The same as No. 1.
 The same as No. 1.

On the 11th at 11.25.—Pressure has increased considerably over S.E. Manchuria and moderately over China. It has decreased slightly over S. Luzon.

An area of high pressure now lies over China. A temporary N.E. monsoon and cooler weather may be expected along the coast.

The shallow depression over the China Sea has shifted slightly to Southeastward.

No returns from Japan

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0.00 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON TO-MORROW.

FORECAST DISTRICT.

Hongkong and Neighbourhood,	N. winds, moderate, fair.
Formosa Channel,	N.E. winds, strong.
South coast of China between Hongkong and Lamocks, ..	The same as No. 1.
South coast of China between Hongkong and Hainan,....	The same as No. 1.

On the 12th at 11.50.—Pressure has increased considerably over N.E. Japan and moderately elsewhere in Japan. It has decreased slightly over Formosa and along the E. coast of China.

The high pressure over China has broken up. A cyclonic system now covers the whole of the Southern area. The centre, which is probably a typhoon, lies about 300 miles to the East of the Bashee channel, and is apparently moving N.W.

Freshening N. winds may be expected along the East coast of China, and moderate W. winds over the China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0.00 inches

FORECAST FOR THE 24 HOURS ENDING AT NOON TO-MORROW.

On the 13th at 11.55.—Pressure has increased considerably over Manchuria and N. Japan, and moderately over central Japan. It is practically stationary elsewhere.
 A cyclonic system still covers the whole of the Southern area, but there are no indications of deepening at the centre, or of movement.
 Moderate N. winds are indicated along the East coast of China, and light or variable winds over the China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0.00 inches

On the 17th at 11.50.—The typhoon, which is a severe one, crossed Formosa yesterday afternoon and entered the coast this morning to the South of Foochow, travelling N.W. or W.N.W.

Pressure has decreased considerably over N. E. Japan, but has increased moderately over the Gulf of Petchili and S.W. Manchuria, which are now covered by an anticyclone.

A moderating N.E. gale is indicated along the E. coast of China, and fresh westerly winds over the N. China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0.00 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON TO-MORROW.

FORECAST DISTRICT.

- 1.—Hongkong and Neighbourhood,
- 2.—Formosa Channel,
- 3.—South coast of China between Hongkong and Lamooke, ..
- 4.—South coast of China between Hongkong and Hainan, ..

N.W. to W. winds, strong but moderating; cloudy, southerly gale, moderating. [some rain.]
The same as No. 1.
West winds, fresh.

T. F. CLAXTON,
Director.

On the 17th at 5.40.—Black North Cone and Drum hoisted.
 On the 18th at 6.20.—Signals lowered.
 At 11.50.—The typhoon curved to W., S.W., and S. after entering the coast, passing within 200 miles of Hongkong. It is now central between Swatow and Luzon, but has nearly filled up.
 A depression which formed over Hokkaido yesterday has travelled northeastward into the Pacific.
 An anticyclone still covers S.W. Manchuria and the Gulf of Petchili.
 Moderate N.E. to E. winds are indicated along the E. coast of China, and variable winds over the N. China Sea.
 Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0.02 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON TO-MORROW. FORECAST DISTRICT.

On the 21st at 12.20.—Pressure has decreased moderately between Shanghai and Wladivostock, and slightly over central Annam. It has increased slightly along the S. coast of China and over the Philippines. The typhoon appears to be moving north-eastward; but this requires confirmation from observations at Formosa and the Loochoos, which are lacking. A shallow depression covers the North China Sea. Moderate N. winds are indicated along the East coast of China, and moderate N.E. winds over the northern portion of the N. China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 1.28 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON TO-MORROW.

On the 22nd at 12.20.—Pressure has increased slightly over the whole of the SW area. The depression over the N. China Sea has filled up, but a tongue of low pressure stretches from the typhoon in the Pacific to the middle of the China Sea.

Yesterday at 2 p.m. the typhoon was about 50 miles to the SE of Naha travelling NNE, no later observations over this district have come to hand.

There are, however, no indications of its menacing the China coast.

Moderate N. winds are indicated along the E. coast of China, and the northern portion of the N. China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0.00 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON TO-MORROW. FORECAST DISTRICT.

On the 23rd at 11.42.—Pressure has increased slightly to moderately over the whole of the W. and S.W. area except the Southern Philippines where it is stationary.

Yesterday at 2 p.m. the typh on was in about 25° N. and longitude 132° E. It is now probably in the vicinity of Kobe.

No returns from Japan.

Moderate N winds are indicated along the E. coast of China, and moderate N.E. winds over the northern portion of the N. China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0.02 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON TO-MORROW.

FORECAST DISTRICT.

-Hongkong and Neighbourhood,	N.E. winds, moderate, fair.
-Formosa Channel,	N.E. winds fresh.
-South coast of China between Hongkong and Lamcocks, ..	The same as No. 1.
-South coast of China between Hongkong and Hainan,...	The same as No. 1.

On the 26th at 11.45.—Pressure has increased slightly along the China coast and at Wladivostock, but has given way slightly over the Philippines and Cochin China.
 The anticyclone now covers China and S. Manchuria.
 The typhoon to the East of the Visayas appears to be moving slowly in a west-north-westerly direction.
 Fresh to moderate monsoon is indicated along the E. coast of China, and over the N. China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0.10 inches.

On the 27th at 11.35.—Pressure is practically stationary over the northern districts. It has decreased moderately over the Philippines, Formosa and S.E. China.

The anticyclonic conditions over the continent are unchanged.

The typhoon is now in about latitude 16° N. and longitude 125° E., travelling W.N.W. It will probably strike F. Luzon early tomorrow morning.

Fresh to moderate monsoon is indicated along the E. coast of China, and over the northern portion of the N. China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0.00 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON TO-MORROW.

FORECAST DISTRICT.

- Hongkong and Neighbourhood,
- Formosa Channel,
- South coast of China between Hongkong and Lamooks, ..
- South coast of China between Hongkong and Hainan,...

- N.E. winds, fresh to moderate; fine.
- N.E. gale.
- N.E. winds, moderate.
- The same as No. 1.

On the 14th at 11.35.—Pressure has decreased over the whole area. The high pressure area which was yesterday central over Korea has passed to the East of Japan. A typhoon has formed to the East of the Visayas. At 6 a.m. this morning it was in about latitude 11° N. and longitude 125° E. travelling W. or W.N.W. Light or variable winds are indicated along the E. coast of China, and moderate E. winds over the N. China Sea. Squally weather in the S.E. portion of the China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0.00 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON TO-MORROW. FORECAST DISTRICT.

On the 16th at 12.00.—The northern depression has deepened and passed Eastward to Hokkaido. A strong anticyclone has formed rapidly over China, central to the N. of the Yangtze. The typhoon passed near Cebu last evening. Probably it is still travelling Westward. No returns from Cebu or Iloilo this morning. Fresh monsoon is indicated along the E. coast of China, and over the northern portion of the N. China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0.00 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON TO-MORROW.

FORECAST DISTRICT.

- 1.—Hongkong and Neighbourhood,
- 2.—Formosa Channel,
- 3.—South coast of China between Hongkong and Lamooks,
- 4.—South coast of China between Hongkong and Hainan,

N. E. winds, moderate to fresh; cloudy, some rain.
 N. E. gale.
 The same as No. 1.

On the 17th at 11.45.—The northern depression has passed into the Pacific. Pressure has increased considerably over S. Manchuria and Japan, moderately along the S.E. coast of China to Haiphong, and slightly over Formosa and the Loochoos. It is giving way over the Yangtze Valley. The typhoon, which curved to N.N.E. yesterday afternoon has now curved again to W.N.W. Its approximate position at 6 a.m. this morning was latitude 15° N. and longitude 121° E. The monsoon will moderate to the N of Fochow. Fresh monsoon may still be expected over the N. China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0.00 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON TO-MORROW.

On the 21st at 10.26.—Pressure has increased considerably over N.E. China and S. Manchuria. It has decreased slightly over N. Luzon, but is practically stationary elsewhere.

No returns from Indo-China.

Shallow depressions lie over Hokkaido and the Visayas. The former will probably pass into the Pacific this evening. The latter shows no signs of deepening.

Moderate monsoon is indicated along the E. coast of China, and over the N. China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0.00 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON TO-MORROW.

FORECAST DISTRICT.

- 1.—Hongkong and Neighbourhood,
- 2.—Formosa Channel,
- 3.—South coast of China between Hongkong and Lamooks, ..
- 4.—South coast of China between Hongkong and Hainan, ...

- E. winds, moderate; fine.
 N.E. gale, moderating.

On the 26th at 12.15.—The depression which formed to the N. of Korea yesterday has deepened and moved eastward. It is now central over Hakodate. Pressure has increased moderately over N.E. China and slightly over S. Japan, the Loochoos and the E. coast of China. It has given way moderately over Luzon, and slightly over S. Formosa and Annam.

A typhoon has formed to the E. of S. Luzon. Its approximate position at 6 a.m. this morning was latitude 13° N. and longitude 126° E., moving W.N.W.

Moderate monsoon is indicated along the E. coast of China, and over the N. China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0.01 inches.

On the 27th at 17.45.—Red South Cone and Drum hoisted.
 On the 28th at 11.40.—Pressure has decreased considerably over N. Japan, a depression which formed yesterday over S. Manchuria having passed to the N. E. of Hokkaido.
 An area of high pressure now covers Korea and central Japan.
 Pressure has decreased slightly along the coast of China and over the Loochoos and Formosa. It has increased slightly over Annam.
 The approximate position of the typhoon at 6 a.m. this morning was latitude 19° N. and longitude 118° E. It appears to be taking a more northerly course and will probably strike the coast near Swatow, or curve north-eastward.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0.00 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON TO-MORROW.

FORECAST DISTRICT.

- 1.—Hongkong and Neighbourhood,

On the 28th at 15.38.—Black South Cone and Drum hoisted.

On the 29th at 12.05.—Signals lowered.

Pressure has increased considerably over N Japan and decreased considerably over central Japan.

An area of high pressure now extends from N.E. China to E. Manchuria.

Pressure is stationary in the neighbourhood of Hongkong, but has decreased slightly over S. Formosa and the Loochoos.

At 5 a.m. this morning the typhoon was near the Pratas. Its speed has decreased considerably. It appears to be curving to northeastward.

The monsoon will set in again along the coast and over the N. China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0.00 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON TO-MORROW.

FORECAST DISTRICT.

- 1.—Hongkong and Neighbourhood,
- 2.—Formosa Channel,
- 3.—South coast of China between Hongkong and Lamooks, ..
- 4.—South coast of China between Hongkong and Hainan,

- N.E. winds, moderate; fine, cooler.
- N.E. gale.
- The same as No. 1.
- The same as No. 1.

On the 31st at 12.05.—Pressure has increased moderately from the Yangtze Valley to Annam and Formosa, and slightly over the Philippines. It has decreased moderately over S. Manchuria.
 No returns from Japan.
 An anticyclone appears to be developing over China.
 Moderate to fresh monsoon is indicated along the E. coast of China and over the N. China Sea.
 Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0.00 inches.

On the 1st at 11.00.—A depression which formed to the N.E. of the Loochoos yesterday morning, has travelled very rapidly to N.E. and now lies to the E. of Hokkaido.

Pressure has increased moderately along the coast of China to Annam, and considerably over the Yangtze Valley, which is now covered by an anticyclone.

A typhoon has formed to the East of the Visayas,

The monsoon will be strong along the E. coast of China and fresh over the N. China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0.00 inches.

On the 2nd at 12.30.—The anticyclone over China has broken up rapidly. Pressure is now highest over N. Japan. A depression has formed over the Gulf of Petchili, and the north of Korea. The typhoon appears to be central near Iloilo travelling westward, but information from this district is lacking. There is no evidence of a severe typhoon. Light or variable winds are indicated along the E. coast of China and moderate monsoon over the N. China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0.00 inches.

On the 4th at 11.15.—Pressure has decreased moderately along the E. coast of China, S. Japan and Annam. It is stationary in the neighbourhood of Hongkong. Pressure is highest to the E. of Japan. The approximate position of the typhoon at 8 a.m. this morning was latitude 14° N. and longitude 113° E. travelling West or W.S.W. The coast near Tourane is threatened. Light or variable winds are indicated along the E. coast of China, and moderate E. winds over the northern portion of the N. China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0.00 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON TO-MORROW. FORECAST DISTRICT.

—Hongkong and Neighbourhood,	E. winds, moderate; fine.
—Formosa Channel,	Variable winds; squally.
—South coast of China between Hongkong and Lamooks, ..	The same as No. 1.
—South coast of China between Hongkong and Hainan, ...	The same as No. 1.

On the 5th at 10.48.—Pressure has decreased considerably over N. Japan, a depression which formed over S.W. Manchuria yesterday having travelled rapidly to the N.E. of Hokkaido. It has increased considerably over N.E. China, an anticyclone being now central over the Gulf of Patchili.

Pressure has increased slightly over Formosa, N. Luzon, and along the coasts of S. China and Annam.

The typhoon in the China Sea has filled up.

The monsoon will freshen along E. coast of China, but remain light to moderate over the N. China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a m to-day, 0.00 inches.

On the 6th at 12.25.—Pressure has increased considerably over N. Japan and from the Yangtze Valley to Wei Hai Wai, and moderately along the East coast to Hongkong, over the Loochoos, and S. Japan. It has decreased moderately at Legaspi owing to the approach of a typhoon which at 6 a.m. this morning was in about latitude 11° N. and longitude 125° E. travelling apparently W. or W.N.W.

Strong monsoon is indicated along the E. coast of China, and moderate to fresh over the N. China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0.00 inches.

On the 8th at 12.10.—A strong anticyclone, central over the Gulf of Petchili, still covers the greater part of the map. The typhoon has travelled rapidly across the S. China Sea and at 6 a.m. this morning was in about latitude 11° N. and longitude 110° E., moving West. Cape St. James is threatened. Observations to hand do not show whether the typhoon is severe or otherwise.

Fresh to strong monsoon is indicated along the E. coast of China and over the N. China Sea.
 Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0.00 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON TO-MORROW.

- 1.—Hongkong and Neighbourhood,
- 2.—Formosa Channel,
- 3.—South coast of China between Hongkong and Lamocks, ..
- 4.—South coast of China between Hongkong and Hainan, ...

E. winds, fresh; fair.
 N E. gale.

On the 11th at 12.10.—Pressure has increased considerably over N. Japan, moderately over central Japan and S. Manchuria, and slightly over Formosa and the Philippines. It has decreased moderately along the E. coast of China. The area of high pressure over China has spread eastward, interrupting the monsoon to the north of Foochow. The monsoon over the N. China Sea will probably weaken.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0.00 inches.

On the 15th at 11.25.—Pressure has increased moderately over the Yangtze Valley to the S. coast of China and Formosa, and slightly over Luzon. The anticyclone is now central to the north of the Yangtze Valley.

The depression which formed yesterday over central Japan has deepened and passed to the east of Hokkaido, The monsoon will probably be interrupted to the north of Foochow but will be fresh over the N. China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0.01 inches.

On the 16th at 11.40.—The anticyclone over China has weakened and moved eastward. It is now central over the Yangtze Valley and the southern portion of the Yellow Sea. The northern depression has passed into the Pacific. Pressure is practically stationary over the southern districts. Variable winds are indicated along the East coast of China, and fresh to strong monsoon over the N. China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0.00 inches.

On the 25th at 11.30.—The northern depression has passed into the Pacific. Pressure has in consequence increased considerably over N. Japan; it is nearly stationary over China, except at Haiphong where it has decreased moderately. At Tourane it has decreased slightly.

The typhoon has entered the China Sea. Its approximate position at 6 a.m. this morning was latitude 15° N. and longitude 118° E., moving W.N.W. or N.W.

Moderate monsoon is indicated along the E. coast of China and the northern portion of the China Sea. Cyclonic gales may occur over the central portion.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0.00 inches.

On the 27th at 11.05.—Pressure has increased moderately over N.E. China, and slightly along the coast to Haiphong, over Formosa and N. Luzon. It is still increasing in the neighbourhood of Hongkong.

A depression has formed to the E. of central Japan.

The approximate position of the typhoon at 5 a.m. this morning was latitude 16° N. and longitude 113° E., moving W.N.W. The coast between Haiphong and Tourane is threatened.

Moderate to fresh monsoon is indicated along the E. and S. coasts of China. Cyclonic gales between the Macclesfields and the Annam coast.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0.03 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON TO-MORROW.

On the 28th at 11.25.—The depression which was to the east of central Japan yesterday has passed into the Pacific. Conditions from Wladivostock over Corea and China to Haiphong remain practically unchanged.

The typhoon in the China Sea was situated in about latitude 16° N. and longitude 111° E., at 6 a.m. this morning, moving W. or W.S.W.

The coast near Tourane is threatened.

Another typhoon is approaching Mindanao (S. Philippines) from the East.

Moderate to fresh monsoon is indicated along the E. and S. coasts of China. Cyclonic gales off the Annam coast.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0.24 inches.

On the 30th at 11.15.—The northern anticyclone has weakened and travelled eastward. It is now central over Korea.

Pressure has decreased moderately along the E. coast of China, and slightly over Formosa and N. Annam. It has increased slightly over S. Luzon.

The approximate position of the typhoon at 6 a.m. this morning was latitude 13° N. and longitude 117° E., moving W.N.W.

Moderate monsoon is indicated along the E. coast of China, and cyclonic gales over the centre of the China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0.00 inches.

Labuan,	"	"

On the 15th at 11.15.—A depression which formed over SW Japan yesterday has deepened and travelled Eastward. It is now central to the S of Kochi.

An anticyclone appears to be forming over China.

Pressure is inclined to give way over N. Luzon and S. Formosa.

The monsoon will probably freshen along the E. coast of China, and over the N. China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0.00 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON TO-MORROW.

FORECAST DISTRICT.

- 1.—Hongkong and Neighbourhood,
- 2.—Formosa Channel,
- 3.—South coast of China between Hongkong and Lamooks, ..
- 4.—South coast of China between Hongkong and Hainan, ...

N. winds, moderate; fine.
 Northerly gale.

On the 16th at 12.00.—Pressure has increased slightly in the neighbourhood of Wei-hai-wei, and decreased moderately over S.W. China. It is nearly stationary over S.E. China and the Philippines.

The anticyclone indicated yesterday has not further developed, though pressure is still highest over the Yangtze Valley.

The depression to the S. of Japan has deepened and passed into the Pacific. Moderate monsoon is indicated along the E. coast of China, and over the N. China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0.00 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON TO-MORROW.

On the 17th at 12.20.—Pressure has increased considerably over Japan, and moderately from Wei-hai-wei, to Wladivostock.

The anticyclone is now central over Korea and S.W. Japan.

Pressure has decreased moderately over central China and along the coast from Shanghai to Haiphong. It has decreased slightly over Formosa, the Philippines and Annam.

Variable winds and squally weather may be expected along the E. coast of China, and over the northern portion of the N. China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0.03 inches.

On the 18th at 12.05.—Conditions are abnormal over the whole map.
 Pressure is highest to the east of central Japan. A depression formed rapidly to the east of Shanghai last night. It will probably move eastward.
 Pressure is recovering slowly over the Yangtze Valley, but has further decreased over Formosa.
 The monsoon will probably set in again along the E. coast of China tomorrow. Light or variable winds are indicated over the China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0.07 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON TO-MORROW.

FORECAST DISTRICT.	
1.—Hongkong and Neighbourhood,	N.E. or variable winds, light to moderate; cloudy,
2.—Formosa Channel,	Variable winds, moderate, squally. [foggy.]
3.—South coast of China between Hongkong and Lamoocks, ..	The same as No. 1.
4.—South coast of China between Hongkong and Hainan,	The same as No. 1.

On the 23rd at 10.50.—Pressure has increased over the whole of China, considerably in the north and moderately in the south. A strong anticyclone is now central to the north of the Yangtze valley.

The depression which was to the south of Japan yesterday, is now situated to the east of Hokkaido.

Strong monsoon is indicated along the E. coast of China and fresh monsoon over the N. China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0.14 inches.

On the 28th at 11.50.—Pressure has given way sharply throughout Japan and the Loochoos, and has increased moderately over S. China and Annam.

The anticyclone has passed into the Pacific and depressions are shown this morning to the East of Japan to the East of Formosa.

Pressure shows a tendency to increase over China.

Strong monsoon may be expected over Formosa Channel and moderate to fresh monsoon over N. China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 1.33 inches.

FORECAST FOR THE 24 HOURS ENDING AT NOON TO-MORROW.

On the 29th at 12.10.—Pressure has increased over the whole of the China coast, especially in the S.E. An anticyclone now covers China and S. Manchuria.
 The Japanese returns are lacking this morning, but the southern depression is probably central over South Japan. The northern depression has moved eastwards into the Pacific.
 Strong to moderate monsoon will continue to prevail over the Formosa Channel and the North part of the China Sea.

Hongkong Rainfall for the 24 hours ending at 10 a.m. to-day, 0.00 inches.
