FORM MAP C

U. S. DEPARTMENT OF AGRICULTURE, WEATHER BUREAU

CHARLES F. MARVIN, CHIEF

DAILY WEATHER MAP

SECOND EDITION

Washington, D. C., Monday, October 15, 1917—8 A. M.

WEATHER CONDITIONS AND GENERAL FORECAST.

The southern end of a cyclonic depression appears this morning south of Hudson Bay, and pressure is also low in the Gulf of Mexico. Quite general rains have fallen in the Lake region and the northern portion of the Middle Atlantic States and New England. Local rains have also fallen in Florida and along the Gulf coast. It is decidedly warmer in the Ohio Valley, the lower Lake region, and the northern portion of the Middle Atlantic States.

Generally fair weather will prevail to-night and Tuesday, except in Florida, along the east Gulf coast, northern New York and northern New England, where local rains are indicated. It will be somewhat cooler to-night and Tuesday in the upper Lake region and the lower Ohio Valley, and it will be cooler Tuesday in the upper Ohio Valley, the lower Lake region, and perhaps in the northern portion of the Middle Atlantic States, although a decided fall in temperature in any part of the district is not anticipated.

The winds along the New England and middle Atlantic coasts will be fresh southerly; on the south Atlantic coast light and variable; on the east Gulf coast gentle east to north-east.

Steamers departing to-day for European ports will have fresh southerly winds and generally fair weather to the Grand Banks.

FORECAST TILL 8 P. M. TUESDAY.

For Northern New England, probably occasional rain to-night and Tuesday; fresh south winds, becoming west.

For Southern New England, showers to-night. Tuesday fair; cooler in western Massachusetts and Connecticut; moderate westerly winds.

For Eastern New York, partly cloudy to-night; probably rain in north portion. Tuesday fair; cooler in north portion; fresh west to northwest winds.

For Eastern Pennsylvania, partly cloudy to-night and Tuesday; cooler Tuesday in west and north portions; moderate westerly winds.

For New Jersey, partly cloudy to-night and Tuesday; cooler to-night on the south coast; moderate westerly winds.

For Delaware, and Maryland, partly cloudy to-night and Tuesday; not much change in temperature; moderate westerly winds.

For the District of Columbia, partly cloudy to-night and Tuesday; not much change in temperature; light variable winds.

For Virginia, fair to-night and Tuesday; not much change in temperature; gentle westerly winds.

For North Carolina, fair to-night and Tuesday; warmer to-night in extreme west portion; gentle westerly winds.

For South Carolina, generally fair to-night and Tuesday, except probably rain on the coast Tuesday; light variable winds.

For Georgia, partly cloudy to-night; warmer in central and northeast portions. Tuesday fair, except showers in south portion; light variable winds.

For Florida, probably showers to-night and Tuesday; gentle east to northeast winds.

For Alabama, and Mississippi, partly cloudy to-night and Tuesday; probably showers near the coast; light variable winds.

For Tennessee, fair to-night and Tuesday; cooler Tuesday in west portion.

For Kentucky, fair to-night and Tuesday; cooler Tuesday.

For West Virginia, partly cloudy and somewhat cooler to-night and Tuesday.

For Western New York, rain this afternoon or to-night. Tuesday partly cloudy and cooler.

For Western Pennsylvania, partly cloudy and cooler to-night and Tuesday.

For Ohio, partly cloudy to-night and Tuesday; cooler to-night in north portion; cooler Tuesday.

For Indiana, fair to-night and Tuesday; cooler to-night in north portion; cooler Tuesday.

For Lower Michigan, partly cloudy and somewhat cooler to-night and Tuesday.

For Upper Michigan, partly cloudy and cooler to-night and Tuesday.

For the Upper Lakes, fresh west to northwest winds and partly cloudy weather to-night and Tuesday.

For the Lower Lakes, fresh west to northwest winds and cloudy weather to-night and Tuesday.

A. J. HENRY, Forecaster.

For Illinois, Missouri, and Kansas, fair, colder to-night and Tuesday.

For Wisconsin, fair to-night and Tuesday; colder in east portion.

For Minnesota, Nebraska, South Dakota, North Dakota, and Montana, fair, colder to-night; Tuesday fair.

For Iowa, fair, colder to-night. Tuesday fair; colder in southeast portion.

For Wyoming, fair to-night; colder in central and east portions. Tuesday fair.

For Colorado, fair to-night; colder in east portion. Tuesday fair.

For New Mexico, fair to-night, Tuesday, and probably Wednesday.

For Arizona, fair to-night; warmer in north-central portion. Tuesday fair.

For Utah, fair to-night and Tuesday.

For California, Nevada, Washington, Idaho, and Oregon, fair to-night and Tuesday.

For Louisiana, fair to-night; warmer in the interior. Tuesday fair; light east to south winds on the coast.

For Arkansas, fair to-night; warmer in southeast portion. Tuesday fair; colder in northwest portion.

For Texas, fair to-night and Tuesday; light southerly winds on the coast.

For Oklahoma, fair to-night. Tuesday fair; colder in northeast portion.

Rice and alfalfa forecast: Probably fair Wednesday in Louisiana, Arkansas, and Texas.

Observations are taken at 8 a. m. and 8 p. m., 75th meridian time.

Barometer readings are reduced to sea level and standard gravity. When heavy dotted red lines appear they indicate regions of marked changes in temperature during the last 24 hours. Shaded areas show regions of precipitation of .01 inch or more during the last 24 hours. Arrows point in the direction the wind is blowing. Solid black lines are isobars and solid red lines isotherms.

Wind velocities of less than 10 miles an hour, and amounts of precipitation of less than .01 of an inch, are not published hereon.

Symbols indicate: ○ clear, ◑ partly cloudy, ● cloudy, R rain, S snow, ⊖ storm warnings, ⊖) storm warnings, cold wave warnings, ⊖) storm track and location of storm center at 8 a. m. 75th, above, time (a. m. or p. m.) below, Ra, Rp, thunder-storms at or near the station during 12 hours ending 8 a. m. or 8 p. m., respectively.

WIND-BAROMETER INDICATIONS.

When the wind sets in from points between south and southeast and the barometer falls steadily a storm is approaching from the west or northwest, and its center will pass near or north of the observer within 12 to 24 hours with wind shifting to northwest by way of southwest and west. When the wind sets in from points between east and northeast and the barometer falls steadily a storm is approaching from the south or southwest, and its center will pass near or to the south or east of the observer within 12 or 24 hours with wind shifting to northwest by way of north. The rapidity of the storm's approach and its intensity will be indicated by the rate and the amount of the fall in the barometer.
