

# Benefits of the NOAA IR

While required to submit to the NOAA IR, there are a number of benefits to authors:

**INCREASED VISIBILITY.** Since the NOAA IR is Google indexed, your publications will be found more often.

More eyes → More citations → Greater impact.

**ARCHIVING & LONG-TERM ACCESS.** The IR serves as a long-term access point for NOAA publications and manuscripts providing backups and NARA transfers for all required documents (saving you time!)

**SAVE MONEY.** Paying for open access can get pricey. By using the NOAA IR as a Green open access method, you can save on APC charges.

**ONE PLACE FOR PUBLICATIONS.** We can link publications together by their author names and office affiliations, datasets, grant numbers and NRDD project IDs.
